

WISTRA CARGOCONTROL

Peter Wiskow

Mark Zobel

Dear Customers

We are proud to present our latest catalog. A colorful revised edition, with a great new format, makes it easier to find all the relevant information you need about our products and services.

New and improved products have enabled us to offer you a wider choice than before.

Our new format provides a clearer picture and will give you an excellent impression of our progressive and modern company.

We sincerely look forward to working with you.

Sincerely yours,

Managing Directors of WISTRA GMBH

Our experience provides you with security

THE COMPANY

At the bottom of the page you can see the history and development of WISTRA.

Over the last few years, we have continuously expanded our product range, offering customers a number of options for cargo safety and security.

Owing to the fast developments in international transport we at WISTRA are constantly facing new challenges.

WISTRA premises in Luebeck-Selmsdorf

In order to fulfil the increased demands in the industry – we only employ highly qualified people – 35 skilled staff are currently working with us.

Thanks to their commitment and professionalism, the future of our company, with excellent services and products remains in safe hands.

1986

Foundation of WISTRA Handelsges. mbH by Mr Peter Wiskow

1997

Certification according to DIN EN ISO 9002
Introduction of WISTRA's own quality management

Approved security in development and production

THE PRODUCTION

Products for textile and mechanical safety are designed, constructed and manufactured with selected materials at our production facility.

Our competent specialists work with very modern machinery.

our production

Owing to the excellent cooperation with partners in the Far East and Eastern Europe, we have been able to expand our capacity, and continue to offer our customers first class products at favorable prices.

We sell POWERBRACE door gears as the official licensee of a proven and innovative American development.

Due to a long and close relationship to manufacturers, we provide a wide range of specialized solutions for seals and anti-theft equipment.

You will definitely find a solution to your needs at WISTRA.

THE QUALITY

All products offered by WISTRA are constantly tested under strict conditions.

We guarantee the consistent excellent quality of our products across the board, we have been certified according to DIN EN ISO 9002 quality management system since in 1997.

certification
DIN EN ISO 9002

material tests at WISTRA

Most of the products we deliver are subjected to extraordinarily heavy workloads and loading stresses whilst in service.

Consequently, the materials we work with have to be able to cope with this kind of use and are tested thoroughly over long periods. This means absolute safety and security for our customers.

1998

Expansion of production site for textile cargo control products in Luebeck-Selmsdorf.

2002

Expansion of distribution facilities through further cooperation in Eastern Europe.

2004

Increasing production capacity by investment of additional sewing automats.

2006

Mark Zobel becomes Managing Director. Starting of Wistra Netherlands.

WISTRA

CARGOCONTROL

WISTRA product range

Here is a short summary of WISTRA security and safety systems for transport by rail, road and sea.

Our product

TEXTILE PROTECTION

WISTRA has a wide range of perfectly constructed textile protection products available for you. We are able to offer you individual tailor made solutions fully meeting your needs.

Example: Safety nets to tie down cargo

well-known transport companies rely on WISTRA products

Sea, rail and road:

WISTRA textile protection products are used on a daily basis, proving their reliability. During assembly of our textile protection products we employ the latest thermal methods.

WISTRA lashing straps are produced according to the latest technical developments according to DIN EN 12195-2 and are generally GS proven.

Safeguard cargo nets are individually constructed and assembled in conformity with the cargo. They are used successfully by many forwarders, including GERMAN POST, GLS and Hermes – the best for rail, post and parcel services.

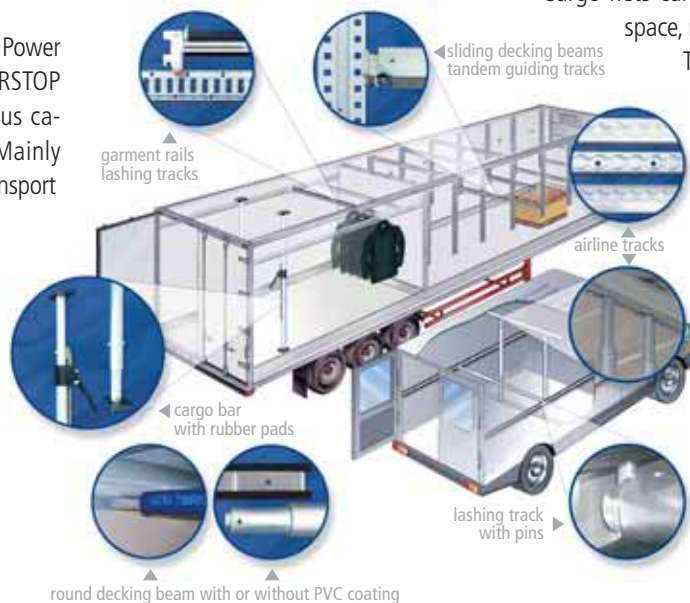

range at a glance

MECHANICAL PROTECTION

These are the rigid safeguarding products. They protect the cargo in all vehicles in form-fit shape. WISTRA designed many of these products as unit construction systems, enabling the use of various restraint tools for the current and up to date rails and wall panels mounted in the vehicle.

The patented WISTRA Power Shoring Beam POWERSTOP showing the enormous capacity of 2,5 tons. Mainly used for combined transport on road and rail.

WISTRA cooperates with the Customs Authority and develops customs security products of the highest standard. Hollow spaces can be closed and sectioned off efficiently.

VANS AND TRAILERS

Textile protection systems such as lashing straps and cargo nets from the SAFEGUARD series, are part of the program for vans and trailers. There are many standard versions proved during practical experience as well as individual solutions according to customer needs.

Cargo nets can be used as a partition of cargo space, reverse protection and tying down.

They can be fixed to the standard lashing points mounted by the vehicle manufacturer. WISTRA also have these end-fittings available.

Naturally, all other systems such as shoring beams and lashing straps can be adapted to vans and trailers. All WISTRA systems offer easy assembly into the tracks and wall panels already mounted in the vehicles.

WISTRA offers a complete and individual solution for protection in vans and trailers.

Feel free to request for more information about individual protection systems. Our specialist team will be happy to advise, of course without obligation!

WISTRA CARGOCONTROL

The WISTRA program for protection, security and lifting equipment

Please consider: Our catalog does not include any extra information for POWERBRACE products as they are produced according to individual needs.

Please contact us for more information.

More security

DOOR GEARS

POWERBRACE is the name of WISTRA's security door gears. This security system is suitable for containers and swap body transport. They are designed and constructed for extreme conditions.

Security door gears in containers

Powerbrace door gears with patented closing feature

Perfectly developed mechanic

Powerbrace door gears with patented closing feature are individually produced. Please contact us, we will be delighted to be of service.

Even if a door has not been closed properly it cannot open. The "over centre action" prevents the door from opening. The POWERBRACE door gears are very small. Their main feature is the extreme horizontal and vertical gathering. This means: security in the means of transport even before loading the goods.

The security pack SECURA: includes various door gears which can be sealed between frame and door panels

The patented Powerbrace door gears have been approved by Germanischer Lloyd (Certificate No. 97544 IIII) and recommended by Deutsche Bahn AG.

... for all purposes

SECURITY SEALS AND THEFT PROTECTION

Owing to the expansion of the European Union and the opening of borders for national and international trade the requirements for a safe transport of goods are increasing. WISTRA is well prepared, offering a wide range of security seals.

Systems for theft protection for every means of transport

WISTRA is the authorized supplier of customs seals for German customs (e. g. self-closing Mini Breakaway).

In order to avoid theft and interference WISTRA has developed an extensive program for theft protection systems. They are designed in such a way that the entire means of transport is safe preventing any access to the goods.

LIFTING DEVICES

The WISTRA range includes round slings and lifting slings with reinforced and high tensile end slings. They are manufactured from the best material in order to meet the highest standards.

Our round slings cover 1,000 to 10,000 kg and can be ordered in lengths of 1 m up to 12 m.

WISTRA lifting slings resist biggest loads.

WISTRA lifting slings are available with slings and end-fittings. The customer may choose different widths and capacities.

Naturally our lifting slings are GS proven – approved security seals.
